Abstract

The paper analyses the roll of the main external funds in the environmental protection. These investments represent an important place in the economic growth and in the same time contribute to the achievement of the objectives of the environmental policy, taking into account the demands imposed by the adhering (65% out of the integration costs are environment costs), finally reducing the gaps between European Union and Romania. However the quality of the environment determines regional attractiveness and as such is a local factor for investment.

Keywords: financial assistance, European Union, environmental policy, European integration.
